

# Video evidence captured today protects everyone tomorrow

***A superior body worn camera backed by Stalker Radar's CopTrax in-car video system with a single start/stop button and "full shift" battery life.***

High-definition video evidence and keep-it-simple operation make the CopTrax Body Worn Camera a straight-forward video solution. Plus, its other features: IR LEDs, still-photo mode, and audio-only, are available when needed. Best of all, this camera can be implemented as a stand-alone system, or as a component of the CopTrax In-Car Video System.

- One-button record start/stop
- Automatically uploads video evidence via dock
- Up to 11 hours of use on a single charge
- 128° field of view
- Records up to full HD 1080p
- Pre-event and post-event recording
- IP65 dust proof and water proof
- 32Gb of storage
- Powerful device manager software
- Covert mode

## ***Versatile and Adaptable***

The CopTrax Body Worn Camera stand-alone system keeps it simple. Record video evidence in the field, drop the camera into the docking station, and download the files to your computer or server.

The system really shines when the video evidence files are uploaded via the docking station to the CopTrax Cloud storage and managed through the CopTrax Command and Control Center Dashboard. Here files can be viewed, searched, tagged, sorted and archived along with video evidence from in-car video, interview room, and other video sources.

# Powerful evidence handling features maintain ease of use and functionality

Five different resolution settings let a department select the combination that best suits them. The 128° field of view captures a wider slice of the action without distorting the image.

Plus, its heavy-duty construction and IP65 rating mean it's built to survive the bumps and bruises of everyday policing.

|               | Resolution | Frame Rate   | Storage Capacity |
|---------------|------------|--------------|------------------|
| 480p          | 848x480    | 30 fps       | 17 hours         |
| 720p          | 1280x720   | 30 or 60 fps | 5.5 hours        |
| Full HD 1080p | 1920x1080  | 30 or 60 fps | 2.5 hours        |

### Other features include:

- Audible alerts and status LEDs
- Photo mode
- Configurable infrared emitters

### CopTrax Body Camera Device Manager

The CopTrax BodyWorn Device Manager presents the same look and feel as the CopTrax In-Car System. Video evidence is uploaded through USB or docking station and can be classified, tagged, stored, archived, and distributed through a system that ensures security and maintains chain of custody.

Optional 9-camera multi-dock
