

Full shift battery life, plus built-in GPS

The CopTrax Model B body-worn camera system

Pre-set events can automatically activate the CopTrax Model B body worn camera so an officer doesn't have to remember to. Things like turning on the light bar, microphone, siren, door opening, and more can signal the Model B to begin recording. Plus, the Model B can be turned on the old-fashioned way – by pressing the 'record' button on the front of the unit. Its built-in GPS places location data directly on the video and embeds it in the video's metadata.

- Automated wireless triggering (coming soon)
- Built-in GPS
- 12-hour, full-shift battery life
- Pre- and post-event recording
- 140° field of view in 1080P HD
- Ruggedized construction meeting MIL-STD-810G

The CopTrax Cloud – secure and seamless

At the end of the shift, just drop the camera into the 10-unit Multi-dock.

The Model B recharges while video evidence is automatically uploaded to CopTrax Cloud storage and managed using the CopTrax Command and Control Center Dashboard.

Through the Dashboard, files can be viewed, searched, tagged, sorted, and archived, along with video evidence from in-car, interview room, and other video sources. The CopTrax Cloud is the ultimate in security and control. The Dashboard can also be hosted on your department servers for secure local storage and sharing of evidence.

The Model B is a complete BWC video system

Magnetic holder

The Model B records at three resolutions ranging from 480p to 1080p in a 140° field of view. As much as 17 hours of video can be recorded and stored. The personal magnetic holder stays put with super strong magnets, while the Vehicle dock recharges when away from the station. Mil-spec MIL-STD-810G construction means it's built to survive the bumps and bruises of everyday policing.

Other features include:

- Vibration, beep, and LED alerts
- Stealth and photo mode
- Configurable infrared emitters
- Interfaces with CopTrax in-car system

	Resolution	Storage Capacity
480p	848x480	17 hours
720p	1280x720	5.5 hours
Full HD 1080p	1920x1080	2.5 hours

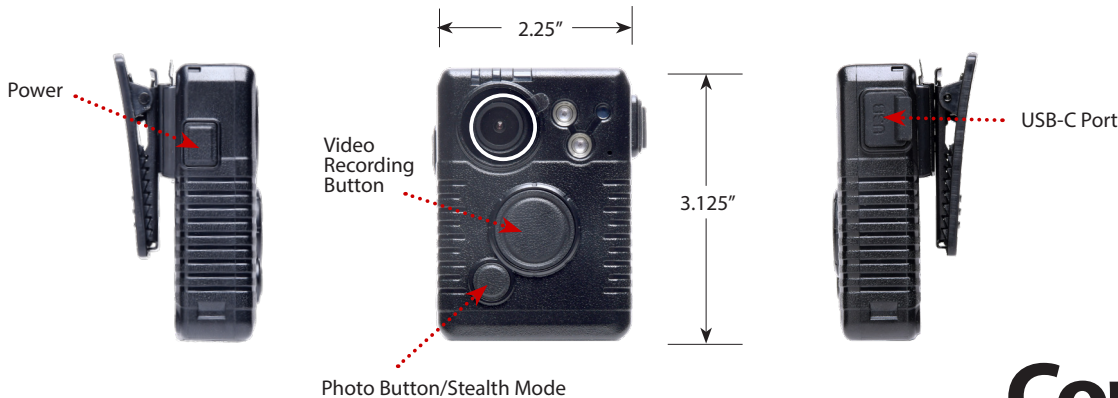

Vehicle dock

CopTrax Body Camera Online Player

The Model B's dedicated evidence handler accepts video evidence through USB or the docking station. Videos can be classified, tagged, stored, archived, and distributed in an environment that ensures security and maintains chain of custody. With it, the CopTrax Cloud, and Multi-dock, the Model B is an outstanding standalone BWC system.
